SUNVAULT GROUP
WHO WE ARE

At SunVault, we are committed to delivering reliable, high-quality solar and battery solutions that help Australian homes and businesses reduce energy costs and take control of their power.

With a strong focus on quality workmanship, compliant design, and customer satisfaction, we specialise in tailored solar PV and energy storage systems designed to suit each customer's energy usage and site conditions. We work with Tier-1 panels, trusted inverter brands, and proven battery technologies to ensure long-term performance and reliability.

Our team manages the entire process from system design and approvals through to installation, commissioning, and ongoing support. We partner with experienced CEC-accredited installers and licensed electricians to ensure every system meets Australian Standards and local network requirements.

As energy prices rise and grid reliability becomes increasingly important, our goal is to provide practical, future-ready solutions — including blackout protection, battery backup, and off-grid capability — so our customers can enjoy energy independence with confidence.

At SunVault, we believe in honest advice, transparent pricing, and long-term relationships built on trust and results.

ASSUMPTIONS AND DISCLAIMER

[1] Battery storage devices may not always provide Back-up, Grid Islanding or Uninterruptible Power Supply (UPS) capabilities.

[2] Australian Small-scale Technology Certificates (STCs) are an incentive provided under the Renewable Energy Target. One certificate is equal to one megawatt hour of eligible renewable electricity either generated or displaced by the installed system. [ONLINE] Read more at: https://cer.gov.au/schemes/renewable-energy-target/small-scale-renewable-energy-scheme/small-scale-technology-certificates.

[3] Battery STCs calculated for the Commonwealth Government's Cheaper Home Batteries Program are based on an assumption of 8.4 STCs per usable kWh of storage (install period 2026 Jan-Apr). The right to create STCs only arises once per premises and does not transfer with the ownership of the premises. Additional solar batteries aren't eligible for STCs after the first claim. [ONLINE] Read more at: https://cer.gov.au/schemes/renewable-energy-target/small-scale-renewable-energy-scheme/small-scale-renewable-energy-systems/solar-batteries.

[4] Inflation and effective interest rates are sourced from the RBA. 20 year bond rate is used as the nominal rate. [ONLINE] Available at: https://www.rba.gov.au/

Note The system design may change based on a detailed site audit. Estimated savings are based on past electrical usage and utility rates provided by the customer where applicable. Actual system production and savings will vary based on final system design, configuration, utility rates, applicable subsidies and your energy usage post-solar installation. Utility rates, charges and fee structures imposed by your utility are not affected by this proposal and are subject to change in the future at the discretion of your utility. The production calculations in this report are based on historical climate data for the site location and represent typical estimates of future solar production.

System end-of-life This system's lifetime expectancy is outlined in the Warranty section below. System removal at end-of-life may incur additional costs. Please contact us for more information on System End-of-life Disposal Services.

System portability This system has been designed for and is intended to be permanently fixed to the property as shown in the Proposed Panel Layout section above. It is not portable and should not be moved without a professional. Please contact us if you would like to modify the location of your installed solar system.

TERMS AND CONDITIONS

Hexagon Energy Pty Ltd trade as SunVault Group

Consent and Confirmation

1. Consent to Use Information:

By entering into this agreement, you consent to us collecting, storing, using, and sharing your personal information in accordance with the Privacy Act. This information will be used for the purposes of fulfilling this agreement and for marketing related products and services to you.

2. Assignment of STCs:

You agree to assign all Small-scale Technology Certificates (STCs) generated by the System and its operation to us, as detailed in Clause 13. This assignment is an integral part of this agreement.

3. Understanding of STCs Process:

You acknowledge that we have explained the process related to the payment and trade of STCs. You understand that STCs are only sold through a Clearing House when a buyer is available, there is no guarantee on the sale time, and the value may vary.

4. Price Adjustments:

You agree that the prices under this agreement may be adjusted under certain conditions as specified in Clause 10. We will notify you in advance if any price changes are necessary.

5. Impact on Electricity Contract:

You acknowledge that having the System installed at your premises may affect your electricity retail contract or tariff. We advise you to contact your electricity retailer for details on any changes that may occur.

6. Explanation of Agreement:

You confirm that we have explained the terms of this agreement to you and that you understand and agree to these terms.

7. Provision of Maintenance Documents:

You agree that we will provide you with the necessary Maintenance Documents once the System is installed and operational.

8. Acceptance of Quote and Terms:

By signing below, you accept the terms of the Quote and the attached Terms and Conditions, thereby entering into a legally binding agreement with us.

Terms and Conditions

1. Precedent

a. The Customer has shown to the Supplier's reasonable satisfaction that they can meet their obligations under this agreement.

TERMS AND CONDITIONS

b. The Customer has granted access to the property for the Supplier or its agents to conduct a Pre-Installation Inspection of the Authorized Area to determine its suitability for solar installation.

c. The Customer has received pre-approval from their grid supplier as per Clause 7(d).

d. The Rebate and any applicable loan have been approved by Solar Victoria under Clause7(a).

2. Terms

a. This agreement begins when the Customer signs our official quote "Acknowledgement and Consents" and the "terms and conditions" and the Supplier is notified by phone, email, or post to the address in the quote.

b. This agreement ends:

1) When the Supplier completes the installation and commissioning of the system, except for Clause 16 regarding Complaints and Warranty.

2) By any party under this agreement.

c. This agreement covers:

1) All materials used for the solar system as described in the quote or system design.

2) The delivery and installation service.

3) The product warranty and workmanship warranty.

d. This agreement is governed by Australian Consumer Law and the New Energy Tech Consumer Code. We will comply with the rules to sell and install the system at your premises.

e. The cooling-off period is 10 business days.

3. Authorized Access

a. The Customer grants the Supplier and its agents or contractors' permission to enter and remain at the Premises to:

1) Conduct site inspections if necessary.

2) Deliver and install the System at a reasonable time, provided the Supplier gives the Customer at least 3 Business Days' notice of the proposed access time.

b. The Customer or their representative must:

1) Be present at the Premises for site inspections and for the delivery and installation of the System.

2) Ensure the Supplier or its agents have convenient and safe access to the Authorized Area of the Premises.

4. Sales and Purchase

a. The Supplier agrees to supply and sell to the Customer the System and installation service.

b. The Customer agrees to purchase from the Supplier the System and installation service according to this agreement.

c. Title, risk, and control of the System pass to the Customer on the date the installation is completed.

TERMS AND CONDITIONS

d. For clarity, Clause 2(b) does not prevent the Customer from claiming warranty.

5. System Delivery

a. The Supplier must deliver the System to the Premises before the installation date confirmed by the Customer, provided that:

1) The Customer's signed agreement has been confirmed by the Supplier.

2) The deposit has been paid.

3) The Customer did not terminate the agreement during the cooling-off period under Clause 11(b (1));

4) Pre-approval as per Clause 7(a)(d) has been officially confirmed.

b. The Customer or their representatives should:

1) Receive and allocate a safe place to store the delivered materials and hand them over to the Supplier's installer on the installation date.

2) Understand that the risk of loss, theft, or damage to the System passes to the Customer upon delivery to the Premises.

6. Installation

a. The Supplier, or a contractor appointed by the Supplier, will Use installers accredited by the Solar Accreditation Australia (SAA).

2) Install the System following the guidelines set by the Solar Accreditation Australia and all other applicable regulations.

3) Secure all necessary electrical safety certifications for the System as required by law.

4) Apply for grid connection approval on behalf of the Customer as detailed in Clause 7(e).

5) Take necessary precautions to ensure the installation is carried out safely and correctly. The Supplier will not be liable for:

1) The structural soundness of the roof.

2) The roof's capacity to bear the System's weight.

3) Any impact on existing roof warranties due to the installation.

4)Any damage to the roof or Premises unless caused by the Supplier’s negligence or breach of this agreement.

b. The Supplier will provide an installation timeline and will make reasonable efforts to adhere to the schedule. However, the Supplier will not be held accountable for delays caused by circumstances beyond its control.

c. The Customer is responsible for:

1) Ensuring the Premises are ready for installation, including providing clear access to the installation site.

2) Being present at the Premises during installation or designating a representative to be present.

3) Ensuring the Supplier or its contractors have safe and convenient access to the installation site.

TERMS AND CONDITIONS

4) If unforeseen issues arise during installation that were not identified during the Pre-Installation Inspection, the Supplier will inform the Customer of any required changes. Any additional costs will be agreed upon before proceeding.

d. After installation, the Supplier will:

1) Clean up the installation site and dispose of any debris or waste materials.

2) Conduct a final inspection to ensure the System is correctly and safely installed.

3) Provide the Customer with relevant documentation, including user manuals and maintenance instructions.

7. Approvals

a. The Customer is responsible for applying for and securing any necessary approvals, permits, or consents required for the installation of the System at their premises, based on the guidelines provided by the Supplier before the System is delivered and installed.

b. The Customer must also obtain any additional approvals or permits that may be required, beyond those specified by the Supplier.

c. The sale and installation of the System, as well as the obligations of both the Supplier and the Customer under this agreement, are independent of and not contingent upon the Customer obtaining these approvals, permits, or consents.

d. The Supplier will handle the application for grid connection pre-approval before delivering and installing the System. If the grid connection pre-approval is not obtained, the Supplier will refund the Customer in accordance with Clause 9(a(3)).

e. The Supplier will apply for Grid Connection Approval on the Customer's behalf and will:

1) Submit the application promptly once the Certification of Electrical Safety is available.

2) Keep the Customer informed about the progress of the application.

3) Terminate this agreement and provide a refund to the Customer under Clause 9(a(3)) if Grid Connection Approval is denied.

8. Invoice and Payment

The Customer must pay the Supplier a deposit upon accepting the offer set out in the Quote.

b. Upon delivery of materials, the Supplier will send the Customer an invoice for the System via email, post, or other agreed methods.

c. Additional invoices may be raised through negotiation with the Customer.

d. The Customer must pay the invoiced amount within 14 days from the invoice date.

e. Payments can be made by bank cheque, money order, cash, debit card, credit card, or direct debit.

f. If the invoice remains unpaid for 30 days after the invoice date, interest will accrue daily on the outstanding amount at a rate of 15% per annum.

g. If the Customer pays by direct debit from a nominated bank account or credit card, the Customer must provide a completed Direct Debit Request.

TERMS AND CONDITIONS

9. Refunds

a. The Supplier must fully refund the Customer if:

1) The Customer terminates this agreement during the cooling-off period in accordance with Clause 2(e).

2) The Customer terminates this agreement within 10 business days of receiving the site-specific design and performance estimate.

3) The Supplier proposes changes to the original design provided to the Customer.

4) There are additional on-site costs that were not identified during the pre-installation, inspection, and the Supplier is not willing to bear these costs.

5) The System is not delivered and installed within 4 weeks after pre-approval is confirmed under Clause 7(a)(d).

6) Either pre-approval or grid connection approval is denied.

7) The Customer terminates this agreement after receiving a notice of a price increase under Clause 10(b).

10. Price Increase

a. The Supplier may adjust the price of:

1) The System or any part of it.

2) The installation services.

3) Any other items specified in the Quote.

b. The Supplier will provide the Customer with written notice of any price increase at least one week before the scheduled installation date. This notice may be sent via email, phone call, or other mutually agreed methods.

c.Upon receiving the notice of a price increase, the Customer has the following options:

1) Accept the new price by notifying the Supplier via email, phone call, or other agreed methods.

2) If the Customer does not respond or does not terminate the agreement within 5 business days of receiving the notice, the price increase will be considered accepted.

3) If the price increase is not acceptable, the Customer has the right to terminate the agreement as specified in Clause 11(a).

11. Termination

a. Any party wishing to terminate this agreement must notify the other party officially by email, phone call, or post to the address set in the quote, in accordance with this agreement.

b. If the Customer terminates this agreement:

1) The Supplier must refund all payments made by the Customer under Clause 9 within 3 business days.

2) In cases not defined in Clause 9(a), the Supplier may retain the deposit to cover ongoing costs.

TERMS AND CONDITIONS

c. The Customer cannot terminate this agreement once the pre-approval has been completed and the materials have been delivered or the installation service has been partly or fully finished.

d. The Supplier can terminate this agreement before installation if:

1) False information from the Customer is detected; or

2) Rebates or loans for the System are cancelled by the regulator.

3) In such cases, if installation has not been started, the Supplier may retain the deposit or charge a cancellation fee up to 10% of system cost to cover ongoing costs; if the installation has been finished, the Supplier can charge the Customer in full according to the quoted system price.

12. Installation Date

a. Both the Supplier and the Customer must use reasonable efforts to complete pre-approvals under Clause 7(a)(d) and confirm the installation date.

b. The Customer must understand that:

1) The installation date is not a strict deadline.

2) Either party can change the installation date with 5 business days' prior notice to the other party.

3) A delay caused by the Customer changing the installation date cannot be a reason to terminate the agreement under Clause 11(b (1)).

4) The Customer cannot change the installation date within 5 business days of the delivery date of the System.

13. Assignment

a. The Customer agrees to assign the Supplier the payment rights, interests, and benefits of:

1) STC incentives.

2) Installation rebates.

3) Any loans for the System installation.

c. The Customer must comply with any reasonable requests from the Supplier to confirm or evidence this assignment.

d. The Supplier can terminate this agreement for failed assignment of Clause 13(a) under Clause 11(c).

e. The Supplier has the right to charge the Customer by renewing or reissuing the invoice under Clause 8(c) if the assignment value is lower than the amount set in the quote.

14. Guarantee

a. The Supplier offers a 5-year warranty that covers:

1) The quality of the installation workmanship.

2) The operational functionality of the System.

3) The performance levels of the System.

TERMS AND CONDITIONS

b. Within the warranty period, the Supplier will address and fix any defects or issues related to the System at no extra cost to the Customer. This includes necessary repairs or replacements to ensure the System functions as intended.

c. This guarantee does not extend to defects or problems caused by:

1) Natural events beyond human control, such as severe weather, that occur after the installation.

2) Misuse, abuse, neglect, or damage inflicted on the System after it has been installed.

3) Maintenance activities that do not follow the guidelines provided in the Maintenance Documents.

4) Repairs, modifications, or re-installation carried out by anyone other than an authorized service technician approved by the Supplier.

5) Structural issues with the roof that do not involve the installed System.

d. This warranty is supplementary to any other warranties provided by the System's manufacturer or mandated by applicable laws, including the Australian Consumer Law.

f. If any claims under this warranty involve additional labour, travel, or delivery expenses, these costs will be the responsibility of the Customer.

g. The Supplier will offer reasonable assistance to the Customer in making warranty claims with the System's manufacturer, ensuring the Customer has the support needed to address any issues.

15. Confidentiality

1) Neither party may disclose the other party's Confidential Information without prior written consent.

2) Confidential Information may be disclosed if:

3) It is in the public domain at the time of disclosure.

4) It is required to be disclosed to perform obligations under this agreement.

5) It is disclosed to professional advisers, bankers, or financial advisers, subject to equivalent confidentiality undertakings.

6) It is necessary for obtaining any required Authorization from official departments.

7) It is required by law.

8) Either party must return any Confidential Information to the other party upon demand.

9) This clause survives the termination or expiry of this agreement.

16. Complaint Handling

a. If the Customer have a complaint related to:

1) The solar system or any of its components.

2) The installation service.

3) Any terms of this agreement.

TERMS AND CONDITIONS

4) The behaviour or performance of our representatives, contractors, installers, or agents.

b. The Customer must provide the following information clearly:

1) A detailed description of your complaint.

2) The Customer contact information.

3) The remedy the Customer are seeking.

4) Any supporting evidence for the Customer complaint, if applicable.

5) The Contract ID as mentioned in the quote to the Customer.

c. The Customer can submit complaint through any of the following methods:

1) Using our online complaint submission system.

2) Calling the Supplier at the phone number provided in your Quote.

3) Sending a written notice via email or post to the address provided in the Quote to the Customer.

d. The Supplier is committed to handling the complaint in accordance with:

1) The New Energy Tech Consumer Code.

2) The Australian Standard on Complaint Handling AS ISO 10002-2006.

e. The Supplier will acknowledge receipt of the complaint as soon as possible.

f. The Supplier will provide a response to any complaint within 15 business days.

g. The Supplier should provide a final response to a complaint within 25 business days, unless agreed by both parties to a further extension.

h. If the Customer are not satisfied with the Supplier response, may escalate your complaint to the following organizations:

1) Clean Energy Council:

Phone: 03 9929 4100

Address: Level 15, 222 Exhibition Street, Melbourne VIC 3000

2) Australian Competition & Consumer Commission (ACCC):

Phone: 1300 302 502

Address: GPO Box 520, Melbourne VIC 3001

3) Consumer Affairs Victoria:

Phone: 1300 558 181

Address: GPO Box 123, Melbourne VIC 3001

TERMS AND CONDITIONS

17. GST (Goods and Services Tax)

a. All amounts specified in the Quote are inclusive of GST, unless otherwise stated.

b. The Customer agrees to pay the GST applicable to all goods and services provided under this agreement.

c. The Supplier will provide a tax invoice that complies with the requirements of the A New Tax System (Goods and Services Tax) Act 1999 (Cth).

d. If there is a change in the GST rate, the Supplier reserves the right to adjust the prices accordingly to reflect the new GST rate.

e. Any other taxes, duties, or levies applicable to the goods and services provided under this agreement are the responsibility of the Customer and will be added to the amounts payable under this agreement.

18. Liability Limitation

Neither party will be liable for any Consequential Loss arising out of or in connection with this agreement, except for:

1) Claims for personal injury, death, loss, or property damage.

2) Breach of law.

3) Circumstances where insurance proceeds would have been available.

4) Events covered by insurance policies.

5) Wilful default.

19. Governing Law and Jurisdiction

a. This agreement is governed by the laws of the jurisdiction where the Premises is located.

b. The parties submit to the exclusive jurisdiction of the courts of the jurisdiction where the Premises are located.

20. General Provisions

a. Any provision of this agreement that is void, illegal, or unenforceable in any jurisdiction is to be read down or severed to be valid and enforceable.

b. Any waiver of rights under this agreement must be in writing and signed by the waiving party.

c. Variations to this agreement must be in writing and signed by both parties.

d. Each party bears its own costs arising from this agreement.

21. Force Majeure

a. If a party is unable to perform obligations due to an Event of Force Majeure, they must notify the other party immediately.

b. Obligations affected by the Force Majeure event are suspended but must be resumed as soon as practicable.

c. Force Majeure does not relieve liability for obligations arising before the event or for payment obligations.

TERMS AND CONDITIONS

22. Definitions

a. "Customer" refers to the party set out in the quote.

d. "Supplier" refers to the party set out in the quote.

e. "Premises" means the location specified in the quote.

f. "System" refers to the solar photovoltaic electricity generation system or battery storage or other Energy efficiency Systems to be installed at the Premises.

g. "Business Day" means a day that is not a Saturday, Sunday, or public holiday.

h. "Claim" refers to any claim or demand for loss or relief under this agreement.

i."Confidential Information" includes trade secrets, technical information, pricing information, and terms of this agreement.

j. "Event of Force Majeure" includes acts of war, natural disasters, and strikes beyond the party's control.

k. "Grid Connection Approval" means approval for connecting the System to the electricity grid.

l. "GST" means the goods and services tax under Australian law.

m. "Laws" refers to any applicable acts, regulations, standards, and codes.

n. "Loss" means any direct, indirect, or consequential loss or damage.

o. "Australian Consumer Law" refers to the consumer protection laws in Australia.

p. "CEC-Accredited Installer" means an installer accredited by the Clean Energy Council.

q. "Deposit" means the initial payment made by the Customer.

r. "System Design" includes the proposed design and specifications of the System.

s. "Quote" refers to the document forming part of this agreement.

t. "STC" means a small-scale technology certificate under Renewable Energy (Electricity)Act 2000 (Cth)

u. “STC Incentive” means the amount specified as such in the Quote.

v."Installation Date" means the date specified for the installation.

w "Authorized Area" means the area designated for the installation.

WARRANTY

Product	Type	Standard warranty	Downloads
Hoymiles HYS-5.0LV-AUG1 (AS4777-2 2020) 5000W	Inverter	10 years	Warranty file
UZ Energy PLPA-L1-10K2 10.24kWh	Battery	10 years	Warranty file

System component warranties are different from the system lifetime. Please see the Assumed Values page.
